Professional Summary

- Detail-oriented MERN Stack Software Engineer with hands-on experience building and optimizing full-stack applications. Proven ability to integrate AI APIs (Gemini), real-time features (Socket.io), and payment gateways (Razorpay). A strong problem-solver (400+ DSA) passionate about building high-quality, scalable code.

Education

Oriental Institute of Science and Technology, B.Tech in Computer Science Sept 2022 – Present
• GPA: 8.22/10.0

Technical Skills

- **Languages:** JavaScript, TypeScript, Core Java, C
- **Full-Stack (MERN):** React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS, GSAP
- **Tools & APIs:** Git, GitHub, VS Code, IntelliJ IDEA, RESTful APIs, Socket.io, Gemini API, Razorpay, Sharp.js, Multer

Experience

The Stackmentalist - Onsite Pune (Software Development Intern) Oct 2025 - Present
• Pioneered the development of RESTful APIs utilizing Node.js and Express, contributing to a 20% reduction in server latency and improved application responsiveness.
• Develop, test, and maintain full-stack MERN components, collaborating with team members using Git for version control and participating in code reviews to maintain code quality.

Sky info Group - Onsite Bhopal (Junior FullStack Intern) July 2025 – Sept 2025
• Integrated a new authentication module into an existing application, resolving a critical access bug that prevented over 50 users from accessing key features and enhancing overall system security.
• Contributed to debugging and feature development using React.js and Node.js, assisting in translating UI/UX designs into high-quality, responsive code.

Projects

Smart Code Reviewer | MERN Stack, Gemini API, Socket.io Live-Link
• Engineered a real-time collaborative coding platform with Socket.io and integrated the Gemini API to provide instant, AI-powered code reviews and summaries.

AI-Powered Civic Complaint Reporting System | MERN Stack, Gemini API Live-Link
• Built a MERN-stack app for civic issue reporting, implementing an AI-powered routing system with Gemini API and Nodemailer for automated department assignment.

AI-Driven Image Compression Platform | MERN Stack, Sharp.js Github-repo
• Developed a MERN-stack image compression service using Sharp.js and Multer for efficient backend processing, optimizing file sizes while preserving visual quality.

AuraStay – Full-Stack Vacation Rental Platform | MERN Stack, Razorpay Github-repo
• Built a full-stack MERN vacation rental platform with JWT authentication, Razorpay payment integration, multi-step bookings, and Redux Toolkit for state management.

Achievements & Leadership

- **Data Structures Algorithms:** Solved 400+ DSA problems (LeetCode/GFG). [Profile]
- **Hackathon Finalist:** Codictive 3.0, BIST Bhopal - Developed AI-driven MERN app for civic reporting. [Details]
- **Outstanding Participant:** Web Development Workshop, Coding Thinker, MANIT Bhopal. [Certificate]
- **Certificate:** Google Dynamic Web UI Development. [Certificate]
- **ACM Community Treasurer (Jan 2023 – Oct 2024):** Managed and allocated budgets for all ACM Student Chapter events, promoting fiscal responsibility.
